GitHub | Live Demo

- Built a synchronized streaming platform using Next.js, Socket.IO, and MongoDB.
- Enabled real-time media playback control across multiple users in a virtual room.
- Implemented features like chat, pause/play sync, and smooth UI transitions.
- Deployed on Render with usage guidelines and fallback loading instructions.

•**Deep Learning Projects Collection**   *Jun-2025*

GitHub

- Implemented foundational deep learning projects using TensorFlow and Keras.
- Worked on CNNs for classification, image recognition, and basic model tuning.
- Demonstrated understanding of supervised learning and evaluation metrics.

EXPERIENCE

•**Co-Lead**   *Sept 24 - Jan 25*

Student Gymkhana Development   IIITV-ICD
- Spearheaded the development of the Student Gymkhana website at IIITV-ICD.
- Utilized Next.js and MongoDB to deliver a high-performance, scalable, and user-centric platform.
- Coordinated with various committees to align features with organizational needs.
- Implemented robust security measures to ensure data integrity and user privacy.
